PROFESSIONAL SUMMARY

Data Analyst with 2 years of experience delivering business-driven analysis and decision support using Excel, Power BI, and SQL. Strong background in data preparation, quality validation, and transforming large, complex datasets into reliable insight products. Experienced in building performance dashboards, defining KPIs, and supporting strategic and operational decisions. Skilled at independently sourcing and structuring real-world data with no pre-existing dataset, and translating findings into clear, actionable business recommendations.

SKILLS

Technical: Microsoft Excel, Power Query, SQL, PostgreSQL, ETL Processes, Power BI, DAX, Data Modeling, Data Cleaning & Preparation, Data Quality Assurance, Dashboard Development, KPI Reporting, Data Mining, Large Dataset Analysis, Business & Operational Reporting, Python (Foundational)

Soft Skills: Stakeholder Communication, Problem Solving, Critical Thinking, Strategy Planning

WORK EXPERIENCE

Data Science & Machine Learning Intern

Sept 2026 – Present

Dataraflo (Remote)

- Undertaking a structured 6-month Data Science, Machine Learning, and Generative AI program with weekly assignments and applied coding practice.
- Built foundational Python programs (conditional logic, loops, functions, file handling); applying existing Excel/SQL/Power BI background to strengthen analytical problem-solving in a programming context.

Data Analyst Intern — Sales Performance Analysis

June 2026 – Aug 2026

AnalystLab Africa (Remote)

- Analyzed a 2,823-order wholesale distribution dataset (2003–2005) in PostgreSQL and Excel; audited data quality via an 11-check process, correcting a placeholder value affecting 46% of unit price records.
- Found Classic Cars drove 39.07% of revenue and the top 10 customers accounted for 29.45% of sales; recommended seasonal inventory alignment (Oct–Nov surge, 3–4x volume) and account management for concentrated customers.

Data Analyst Intern — Online Retail Sales Analysis

June 2026 – Aug 2026

AnalystLab Africa (Remote)

- Analyzed 541,909 UK online retail transactions (Dec 2010–Dec 2011) in PostgreSQL and Power BI; cleaned data while retaining 130,000+ legitimate transactions with missing customer IDs.
- Built a 4-page Power BI dashboard revealing one customer generated ~£280K (2x the next highest) and revenue peaked pre-Christmas in November; recommended Q4 inventory scaling and distinct strategies for Netherlands/Germany.

Data Analyst — Customer Retention & Churn Analysis

June 2025 – Sept 2025

Academic Project (Remote)

- Analyzed customer transaction and behavior data using Excel, SQL, and Power BI to calculate churn rates, retention metrics, and customer lifetime value (LTV).
- Built interactive dashboards visualizing churn trends and high-risk segments; recommended early onboarding improvements, long-term contract incentives, and risk-based segmentation.

PROJECTS

Independent Data Audit — E-Commerce Catalog Integrity Analysis

Personal Project

- Independently sourced and structured live product data from a Nigerian e-commerce platform (18 departments, 240+ products) using PostgreSQL, with no pre-existing dataset provided.
- Built a two-table SQL data model and diagnostic queries validating the platform's published catalog claims against its actual live data, uncovering a 2.5x discrepancy between marketed and true inventory size.
- Delivered a 5-page interactive Power BI dashboard and case study translating technical findings into prioritized business recommendations.

EDUCATION

Bachelor of Technology – Mechanical Engineering, Obafemi Awolowo University

CERTIFICATIONS

- Certificate of Completion, Data Analytics — Idealnovate Data School
- Professional Data Analytics — TechCrush Data School
